## Commercial Cross Connection Control Survey

In order to protect the water supply from being contaminated, we are conducting a survey to determine if there are any hazardous conditions that could affect our drinking water.

We appreciate you taking the time to complete this survey.

If you have any questions regarding this survey please contact:

**TEST Inc.**

**(815) 224-1650**

**The information provided is an accurate and current description of your water system at this address.**

**Please print your information below and sign your name as confirmation of the person completing this survey.**

Name: \_\_\_\_\_

Signature: \_\_\_\_\_

Address: \_\_\_\_\_

Date: \_\_\_\_/\_\_\_\_/\_\_\_\_

e-mail: \_\_\_\_\_

Phone #: (\_\_\_\_) \_\_\_\_\_ - \_\_\_\_\_

1 Do you have any other sources of water, such as a private well or tank that is connected to the water system?

☐ YES    ☐ NO    Mark all that apply:    ☐ Well    ☐ Pond    ☐ Lake    ☐ Tank    ☐ Other

## Mandatory Cross Connection Control Survey is enclosed

The water system is required by the EPA to have a Cross Connection Control Program in place. Part of the program is a mandatory **Triennial** Cross Connection Control Survey to be filled out by all residents and businesses connected to the water system.

**Please take the time to fill out this survey.**

**Return the completed survey with your water bill.**

**Or you may fill out the form online and submit it electronically at:**

**<https://testinc.jotform.com/251133755917157>**

If you answered "**YES**" to any of the questions on the front of this form, please contact your water superintendent to discuss your situation and to see if you need to have a Backflow Prevention device installed.

**If you do have a Backflow Prevention Device installed, it has to be tested/inspected annually by a plumber with a Backflow Prevention Certification.**

**A copy of your annual testing/inspection report must be submitted to the City Clerk or Water Superintendent.**

The Illinois Department of Public Health Plumbing Code requires that vacuum breakers be installed on all outdoor faucets. These devices protect the water supply from being contaminated by any substance which might enter the water hose and flow back into the system (i.e. fertilizer, herbicides, soap, etc.). Hose vacuum breakers can be purchased at most hardware stores and home and garden centers.

### Hose Bibb Vacuum Breaker

Can be purchased from a local hardware store or home improvement center.

Installation: EASY (DIY)

**OR**

### Sillcock with Vacuum Breaker

Can be purchased from a local hardware store or home improvement center.

Installation: May need a Plumber
